

Figure 2 **Distribution of indurations by size: blue dots, data points; black and green lines, Normal distributions; red line, sum of the 2 Normal distributions; blue line fitted curve allowing for digit preference. The parameters of the 2 Normal distributions are: $m_1 = 7.92$; $s_1 = 2.34$; $N_1 = 1357$; $m_2 = 12.18$; $s_2 = 4.01$; $N_2 = 1458$.**
