

Table 5 Risk factors for major depression among the women as determined by regression analysis

Independent variable	B	SE	df	P-value	Exp(B)	95% CI for exp(B)	
						Lower	Upper
Abuse throughout childhood & adolescence	1.444	0.399	1	< 0.001	4.240	1.938	9.272
Physical & sexual abuse	1.337	0.389	1	< 0.001	3.806	1.775	8.161
Severe abuse	1.331	0.130	1	< 0.001	3.885	2.935	4.882

SE = standard error; CI = confidence interval; df = degrees of freedom.
