

Table 3 Odds ratio for 24-hour mean levels of particulate matter (PM₁₀) and carbon monoxide (CO) for patients with first episode of acute coronary syndrome (n = 250)

Pollutant	Unadjusted OR (95% CI)	Adjusted OR (95% CI) ^a
CO level (ppm)	1.18 (1.03-1.35)	1.18 (1.03-1.35)
PM ₁₀ level (μ)g/m ³)	1.00 (0.99-1.02)	1.00 (0.99-1.02)

^aAdjusted for temperature, humidity and holiday status.

OR = odds ratio; CI = confidence interval.
