

Table 3 Follow up of newborns screening positive for phenylketonuria (PKU) (January 1995 to December 2011)

Variable	Borderline (PHA 3–4 mg/dL)		Abnormal (PHA > 4 mg/dL)		Total
	No.	%	No.	%	No.
PKU	–	0.0	52	91.2	52 <sup>a</sup>
Benign hyperplasia	11	15.1	5	8.8	16
Transient	3	4.8	–	0.0	3
False +ve	61	80.1	–	0.0	61
Total +ve screening	75	100.0	57	100.0	132

<sup>a</sup>51 cases were diagnosed as classical PKU and 1 case as PKU due to bipterin deficiency.

PHA = phenylalanine.
