

**Table 2** Frequency of positive specific human papillomavirus (HPV) genotypes from samples of malignant breast cancer tissues

Genotype	Malignant tumour group ( <i>n</i> = 129)		
	No.	% <sup>a</sup>	95% CI
31	39	30.2	22.3–38.1
18	35	27.1	19.4–34.8
16	33	25.6	18.1–33.1
33	16	12.4	6.7–18.1

<sup>a</sup>Friedman test comparing genotypes ( $P < 0.001$ ).

CI = confidence interval for prevalence.
