

Box 1.

ICU admission rate in 2014 = $\frac{\text{Cases admitted to ICU}}{\text{Total number of deliveries}} \times 100.00 = 3.739/100.000 \text{ deliveries or nearly } 4\%$

Maternal near-miss mortality ratio = maternal near-miss cases:maternal deaths = 10.8:1

Mortality index = $\frac{\text{Maternal deaths}}{(\text{Maternal near-miss cases} + \text{Maternal deaths})} \times 100.00 = 8.5\%$
