

Table 5 Logistic regression analysis to identify significant predictors of ADHD symptoms (*n* = 480)

Predictor	B	Wald	Significance	Odds ratio
Age (yr)	-0.85	06.73	0.008**	0.48
Gender	-0.10	10.21	0.001**	0.95
Birth order	0.01	0.35	0.55	1.01
No. of siblings	1.50	8.34	0.004**	4.45
Maternal educational level	-0.21	0.38	0.53	0.80
Paternal educational level	0.11	0.14	0.71	1.12
Consanguinity	-0.17	0.09	0.75	0.84
Family mental health problems	1.09	4.87	0. 27	2.99

**P* significant at ≤ 0.01 .

***P* significant at ≤ 0.001 .

ADHD = attention deficit hyperactivity disorder.
