

**Table 1** Cases per million, mean estimated doubling time, and percentage of countries with flattened epidemic curves by democracy group and early/late implementation of strict movement restrictions (as of 1 June 2020)

	Cases per million	P-value	Mean estimated doubling time (in days) over past 7 days	P-value	Percentage of countries that have flattened the curve	P-value
<b>Democracy Group (N=40)</b>						
1 (Least democratic) (N=14)	1442.3 (324.5, 2560.2)	REF	23.2 (17.3, 29.1)	REF	7.1 (0.0, 21.6)	REF
2 (N=13)	2534.6 (0.0, 5692.6)	0.414	101.8 (0.0, 204.7)	0.066	30.8 (3.8, 57.7)	0.160
3 (Most democratic) (N=13)	199.7 (137.0, 262.5)	0.353	48.5 (23.2, 73.9)	0.545	38.5 (10.1, 66.9)	0.065
<b>Implemented strict movement restrictions early (N=44)</b>						
Yes (N=9)	596.1 (16.9, 1175.3)	0.481	49.0 (20.8, 77.3)	0.977	66.7 (28.2, 100.0)	0.003
No (N=35)	1549.6 (70.5, 3028.7)		48.2 (17.0, 79.3)		16.7 (2.5, 30.8)	

P-values calculated with t-tests. CI = Confidence Interval
