

Table 5 Sensitivity and specificity of diagnosis made by consultees in relation to those made by consultants

Diagnosis made by psychiatrist	No. of diagnoses Diagnosis made by consultee							Total	Sensitivity ^a (%)
	A	B	C	D	E	F	G		
Depression (A)	33	16	6	1	3	1	5	65	50.8
Anxiety (B)	10	8	1	0	2	1	2	24	33.3
Psychosis (C)	3	0	7	0	0	0	4	14	50.0
Organic brain syndrome (D)	2	2	5	13	0	0	9	31	41.9
Substance abuse (E)	4	3	1	1	13	0	0	22	59.1
Personality disorder (F)	2	1	5	0	6	0	0	14	0.0
Other (G)	9	4	1	1	2	0	3	20	15.0
Total	63	34	26	16	26	2	23	190	
^b Specificity (%)	52.4	23.5	26.9	81.3	50.0	0.0	13.0		

^a*Sensitivity = number correctly diagnosed by consultee in a certain diagnosis category/total number diagnosed by the psychiatrist in the same diagnosis category.*

^b*Specificity = number correctly diagnosed by consultee in a certain diagnosis category/total number diagnosed by the consultees in the same diagnosis category.*
