

Coronavirus Disease 2019 (COVID-19) Situation Report

Data as reported by national authorities by 23:00 local time 13th of January 2021

Situation Report No. 217 - State of Kuwait
14th of January, 2021

	Global		Eastern Mediterranean Region	
	COVID-19 Cases	COVID-19 Deaths	COVID-19 Cases	COVID-19 Deaths
Total	90,335,008	1,954,336	5,222,466	126,042
New	593,409	12,295	25,840	454

State of Kuwait

	Confirmed Cases	Recovered Cases	Deaths	Active Cases	Critical Cases	PCR Tests
Total	155,874	149,809	946	5,119	48	1,359,421
New	539	234	0	-	-	11,567

HIGHLIGHTS

- MoH continues to review the result of studies on the effectiveness and safety of AstraZeneca vaccine and verify the quality reports and level of the manufacturing before giving the license of the emergency use.
- Gulf Health Council published the gulf guideline for the diagnosis and treatment of COVID-19 guide, the second version (1.1), see link.
- The Ministry of Health has designated a link on its website to register for receiving the vaccine, see link.
- WHO produces evidence to recommendations: Methods used for assessing health equity and human rights considerations in COVID-19 and aviation, see link.
- Unicef publishes the "Vaccine Misinformation Management Field Guide", see link.
- WHO provides guidance on who can take the Pfizer-BioNTech COVID-19 vaccine, see link.

IMPORTANT DEFINITIONS

Who can take the Pfizer-BioNTech COVID-19 vaccine?

According to SAGE (WHO's Strategic Group of Experts on Immunization), the Pfizer-BioNTech COVID-19 mRNA vaccine is safe and effective. Nevertheless, there are specific populations for whom vaccination is not recommended for a variety of reasons. These populations currently include people with a history of severe allergies, (particularly it is contraindicated for People with a history of severe allergic reaction to any component of the vaccine), most pregnant women (except for those with unavoidable high risk of exposure such as health workers), international travellers who are not part of a prioritized group (due to limited supplies of the vaccine at present), and children under 16 (due to lack of data). Further studies are needed for immune-compromized persons. The priority is to start vaccinating health workers at high risk of exposure, followed by older adults, before immunizing the rest of the population. For more details see the link above.

IMPORTANT CONTACTS

- **The National Focal Person is Dr Buthaina AIMudhaf, Assistant Undersecretary, Ministry of Health, email: AIMudhaf@gmail.com**

Number of New Cases
