

# Coronavirus Disease 2019 (COVID-19) Situation Report

Data as reported by national authorities by 23:00 local time 20<sup>th</sup> of January 2021

Situation Report No. 222 - State of Kuwait  
21<sup>st</sup> of January, 2021

	Global		Eastern Mediterranean Region	
	COVID-19 Cases	COVID-19 Deaths	COVID-19 Cases	COVID-19 Deaths
<b>Total</b>	94,963,847	2,050,857	5,408,924	129,171
<b>New</b>	496,206	12,933	24,991	473

## State of Kuwait

	Confirmed Cases	Recovered Cases	Deaths	Active Cases	Critical Cases	PCR Tests
<b>Total</b>	159,264	152,420	951	5,893	54	1,425,480
<b>New</b>	442	484	1	-	-	10,283

## HIGHLIGHTS

- A Kuwaiti female doctor in Al-Salaam health center dies of COVID-19.
- Passengers travelling to Kuwait have to pay additional 50 KD for tickets after decision that airlines are to be charged for PCR tests. Two tests will be conducted, on arrival and after 7 days of the quarantine that lasts for 14 days.
- Gulf Health Council published the gulf guideline for the diagnosis and treatment of COVID-19 guide, the second version (1.1), see link.
- Unicef publishes a "Vaccine Misinformation Management Field Guide", see link.
- WHO provides a practical guide for analysing and using routine data to monitor the effects of COVID-19 on essential health services, see link.
- WHO publishes Interim recommendations for the use of the Pfizer-BioNTech COVID-19 vaccine, under Emergency Use Listing, see link.

## IMPORTANT DEFINITIONS

### Who can take the Pfizer-BioNTech COVID-19 vaccine?

According to SAGE (WHO's Strategic Group of Experts on Immunization), the Pfizer-BioNTech COVID-19 mRNA vaccine is safe and effective. Nevertheless, there are specific populations for whom vaccination is not recommended for a variety of reasons. These populations currently include people with a history of severe allergies, (particularly it is contraindicated for People with a history of severe allergic reaction to any component of the vaccine), most pregnant women (except for those with unavoidable high risk of exposure such as health workers), international travellers who are not part of a prioritized group (due to limited supplies of the vaccine at present), and children under 16 (due to lack of data). Further studies are needed for immune-compromized persons. The priority is to start vaccinating health workers at high risk of exposure, followed by older adults, before immunizing the rest of the population. For more details see the link above.

## IMPORTANT CONTACTS

- The National Focal Person is Dr Buthaina AIMudhaf, Assistant Undersecretary, Ministry of Health, email: [AIMudhaf@gmail.com](mailto:AIMudhaf@gmail.com)
