* Confirmed polio cases refer to wild isolation from AFP cases or from contacts of negative index AFP cases

** Non-polio AFP per 100,000 children <15 years

*** Adequate here refers to two stool specimens collected at least 24 hours apart, within 14 days of paralysis onset

**** AFP cases co infected with P1 and P3 are counted separately as wild isolates

In 2012, 1 AFP case in Pakistan had co infection P1 & P3 from 2 contacts P1 & P3

* Specimens from all sources including non-AFP cases, excluding environmental samples

** This indicator reflects surveillance and laboratory activities

Total wild P1 cases for Syria in 2013 is 35 cases. Table (5) in Polio Fax reflecting lab data is only showing 25 wild cases. In addition 2 cases were identified by positive contact from negative index cases. Other 8 wild cases were cross notified and not processed in National Polio Lab of Syria

Environmental surveillance initiated in **Egypt** in September 2000 showed the following:
