* Confirmed polio cases refer to wild isolation from AFP cases or from contacts of negative index AFP cases

In 2012, 1 AFP case in Pakistan had co-infection P1 & P3 from 2 contacts P1 & P3

** Non-polio AFP per 100,000 children <15 years

*** Adequate here refers to two stool specimens collected at least 24 hours apart, within 14 days of paralysis onset

**** AFP cases co infected with P1 and P3 are counted separately as wild isolates
