

In 2011, the number of locally transmitted malaria cases decreased by 94.3% compared with 2002. During the period 2009 to 2011 the average number of reported locally transmitted cases was 52.

## 1. Malaria burden and risk

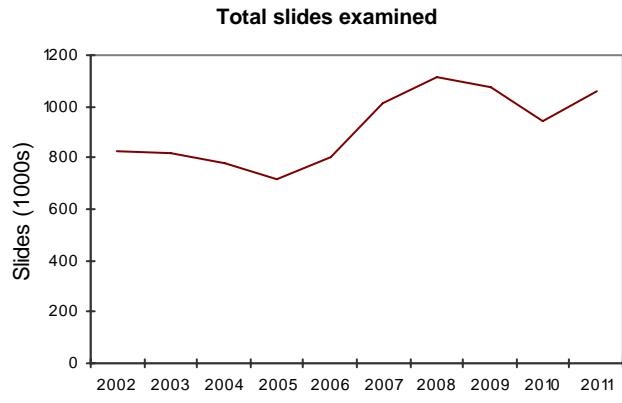

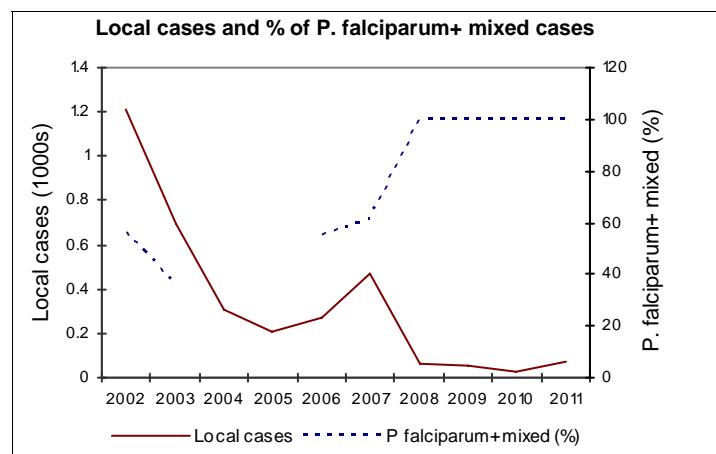

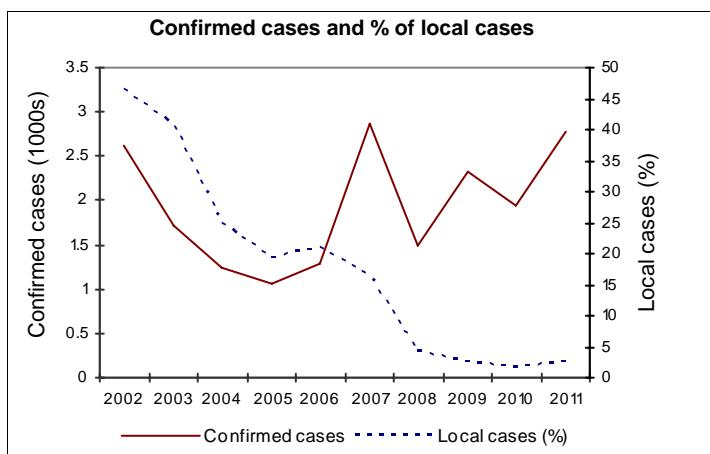

### Population, endemicity and malaria burden

| Population               | Number     | %    |
|--------------------------|------------|------|
| Total population         | 28 082 541 |      |
| Population under 5 years | 3 185 733  | 11.3 |
| Male population          | 15 506 615 | 55.2 |
| Rural population         | 5 034 076  | 17.9 |

### Population by malaria endemicity

|  |            |
|--|------------|
| No. of active foci                         | 68         |
| No. of people living within active foci    | 3 226 627  |
| No. of people living in malaria-free areas | 24 855 914 |

### Morbidity trends

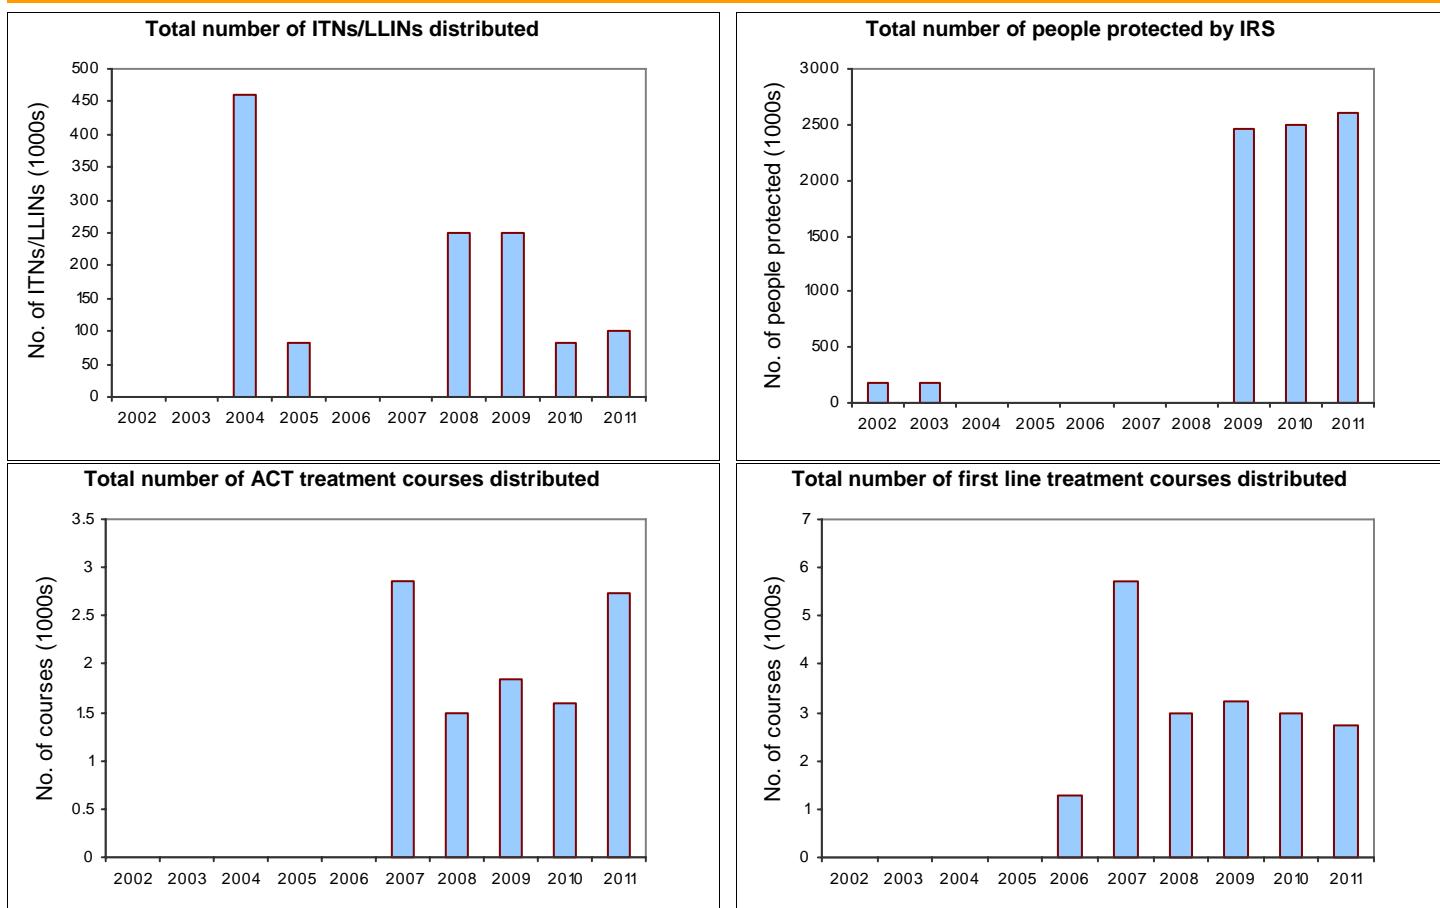

| Country     | P. falciparum | P. vivax | Mixed | Other species | Not classified | Total |
|-------------|---------------|----------|-------|---------------|----------------|-------|
|             |               |          |       |               |                |       |
| Yemen       | 770           | 135      | 4     | 0             | 0              | 909   |
| India       | 62            | 824      | 0     | 1             | 0              | 887   |
| Pakistan    | 58            | 516      | 0     | 0             | 0              | 574   |
