

# TOBACCO HARMS

# THE ENVIRONMENT

## #TobaccoExposed

Tobacco growing, manufacturing and use poison our water, soil, beaches and city streets with chemicals, toxic waste, cigarette butts, including microplastics and e-cigarette waste

Don't fall for the tobacco industry's attempt to try and distract from its environmental harms by greenwashing their products through donations to sustainability initiatives and reporting on environmental "standards" they often set themselves

## ON THIS WORLD NO TOBACCO DAY:

### Make the tobacco industry clean up their mess

The tobacco industry is making profit by destroying the environment and needs to be held accountable for the environmental destruction and made to pay for the waste and damages, including to recover the cost of collecting these wastes

### Quit tobacco to save our planet

Tobacco smoke contributes to higher air pollution levels and contains three kinds of greenhouse gases.

### Help tobacco farmers switch to sustainable crops

Governments and policy makers should support tobacco farmers to switch to alternative, more sustainable livelihoods to reduce the environmental impact of tobacco growing, curing and manufacturing while continue to implement tobacco control measures
