

Key Figures - From January to Feb

Service Utilization January-February

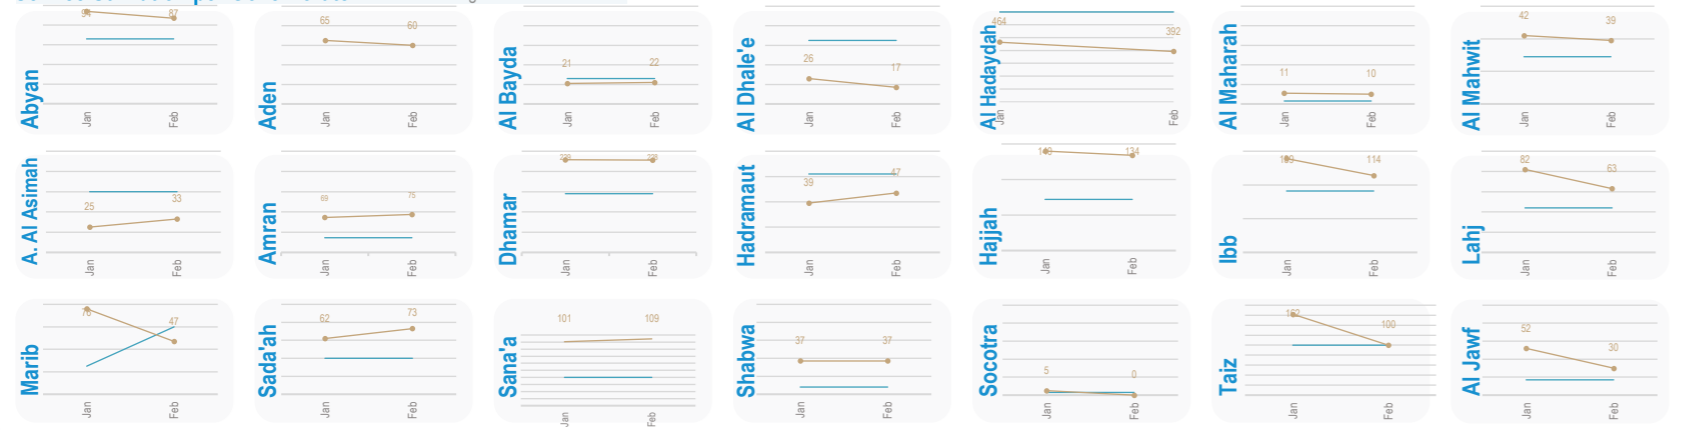

From January to Feb **3,814** children have received life-saving services in WHO-supported TFCs, of which **713 (19%)** are children under 6 months.

The quality of service is evidenced by the recovery (**96%**) and death (**1%**) rates. Each caregiver (**3,814**) in total benefits from at least 5 counselling sessions per hospital stay on IYCF best practices. This might contribute to the observed decrease in relapse rate (**2%**) in Feb.

By ensuring the care for most critical cases in pediatric wards in referral hospitals with TFCs, **4,414** children were admitted from Jan to Feb in these referral hospitals for intensive care.
